

From the desk of: David Todd
New Hyperion Branch Manager

Agents,

I scanned the ad into the CryptCo cryptographic signature analyzer, and it detected an anagram and a request for help.

I was unable to order the framed poems, because the phone number on the ad is fake. Whoever placed the ad may have sent the framed poems to the branch office, so if you can identify the agent, they should be able to retrieve any packages for that agent.

I've left you a list of agents who might be in the New Hyperion area. Just enter their file # into the database to pull up their record.

Good Luck!

Dave
NH Branch Manager
