Dr. Goldwater is one of five leading Home Office scientists to go missing in the last year. The whereabouts of Dr. Goldwater are unknown. It is possible she has been murdered, kidnapped, or recruited by an enemy agency. Dr. Goldwater's expertise in cryptography makes her an especially valuable target for the Earth First Syndicate, who has been focused on taking control of the Home Office's space exploration and defense systems as part of their mission to bring about the end of days. Dr. Goldwater's security clearance and access to Home Office systems were revoked upon her disappearance.
