

# MR. DIDDLEWIDGE

Optical Door Lock

Your Mr. Diddlewidge Optical Door Lock is designed to keep the bad guys out, and your precious valuables inside, safely locked away. Use any 4-digit code on ANY door!

*Pantry!*

1234

*Basement!*

5678

*Boudoir!*

9012

## Troubleshooting

If your number pad stops working for any reason, you will need to program the LCD to generate a 5-digit override code.

Use the patterns on the next page to display the entry code that you have hopefully memorized.

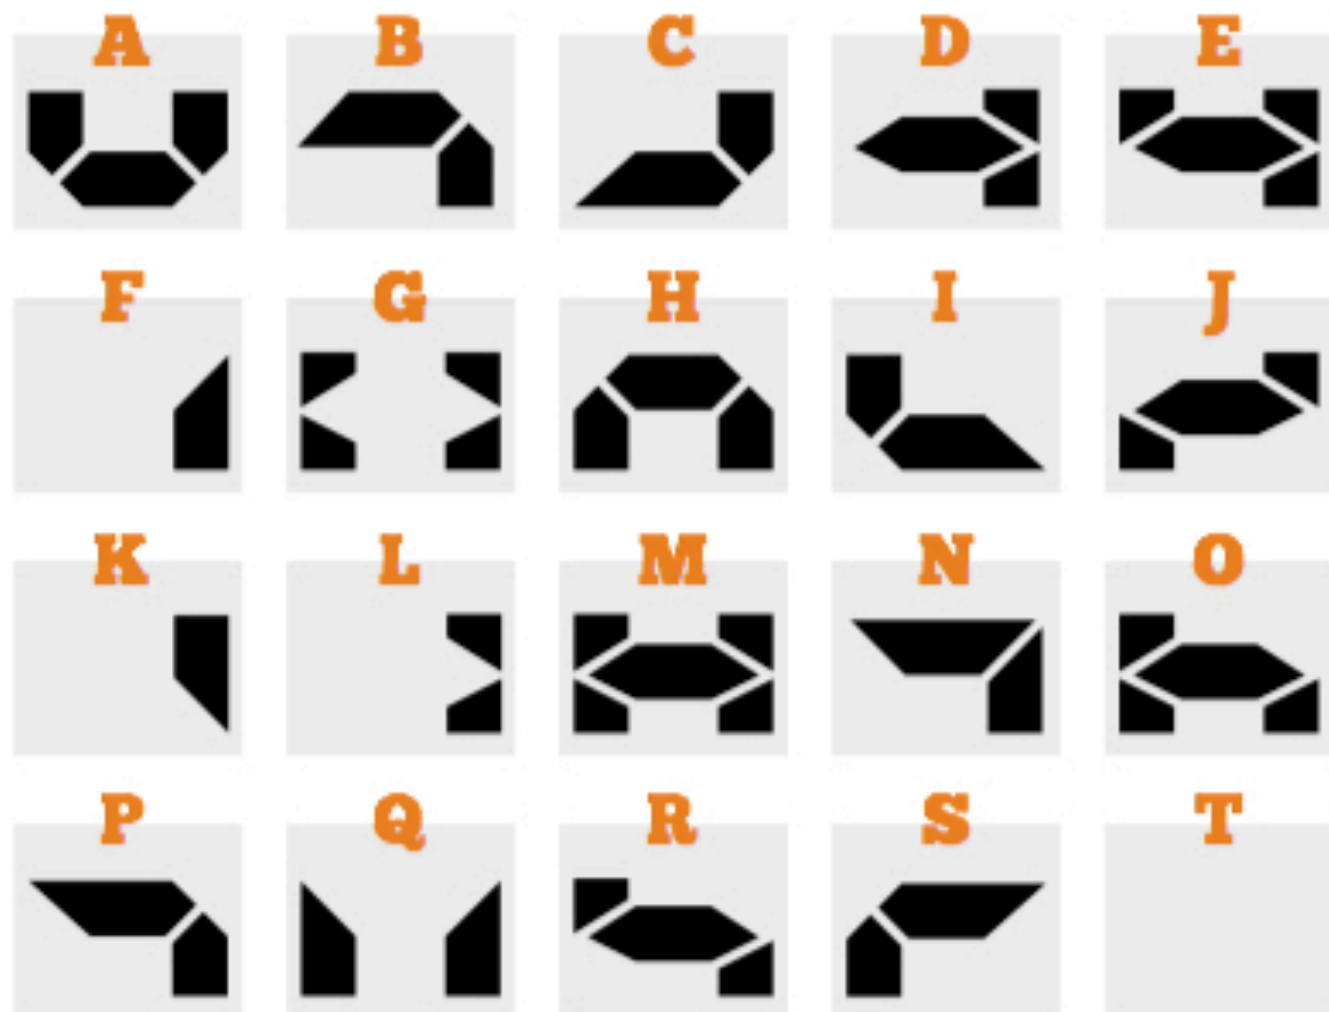

Once your entry code is displayed correctly, just push the "Override" button to get your override code!

## LCD Display Patterns

Programming the 4 x 3 LCD is easy! First, slide up the cover. Then enter the letter of the pattern you wish to display in each of the cells and hit the ENTER key to change the display for that row of cells.
